## **GhostGreen in Ba Section**

Title:  
Empowering  
Rural Farmers  
with Clean  
Irrigation in  
Nigeria

(Patent: Smart  
Solar Water  
Pump – SDG  
2.4 – Country:  
Nigeria)

Irrigation in  
Nigeria

In many  
Nigerian

villages,  
farmers rely on  
rain or costly  
fuel pumps to  
water their  
crops. The  
**Smart Solar  
Water Pump**  
changes that  
by using the  
sun a free and

abundant  
energy  
source to  
pump water to  
their fields.  
This simple  
solution helps  
farmers save  
money, reduce  
stress, and  
grow more

food. It  
supports  
families by  
ensuring their  
crops survive  
dry spells,  
which helps  
fight hunger  
and poverty  
The system is  
easy to use,

and doesn't  
need fuel,  
wires, or  
complex parts.  
With  
community  
support, local  
cooperatives  
can install and  
maintain it. In  
turn, this

encourages job  
creation and  
new  
opportunities  
in the green  
economy.  
This project  
supports **SDG**  
**Goal 2.4** by  
helping  
Nigerian

farmers grow  
food in a more  
sustainable  
way, while  
protecting the  
environment  
and building a  
better future  
for rural  
communities. -
