**and the Sun  
That Grew  
Tomatoes**

(Patent: Smart  
Solar Water

Pump – SDG  
2.4 – Country:  
Nigeria)

Ayo stood at  
the edge of his  
father's dusty  
farm, watching  
the dry soil  
crack under  
the sun. Rain

hadn't come  
for weeks. His  
family was  
losing hope —  
until the  
village  
cooperative  
brought  
something  
new: a **solar-**

**powered  
water pump.**

At first, it  
looked like  
magic. A panel  
faced the sky,  
and somehow  
water flowed  
into their tired  
land. The

tomatoes, once  
weak and  
withered,  
stood tall  
again. Ayo's  
mother began  
selling extras  
at the local  
market.

"The sun saved  
us," she  
smiled.

Months later,  
their neighbors  
came to see.  
More pumps  
arrived. The  
land bloomed.  
School

reopened  
because  
families could  
afford fees.  
Ayo started  
drawing solar  
panels in his  
notebook,  
dreaming of  
becoming an  
engineer.

In Nigeria,  
where the sun  
once meant  
drought, it now  
meant life.
